

# Designer résumé 2010–24 Maxim Aginsky Architecture UX Design System GUI

Design serves as a communication tool, enabling interaction with others and self-reflection.

I've been designing for over a decade, yet I still have many unanswered questions.

Maxim Aginsky

Digital—first multidisciplinary designer

Résumé

## [Questioning]

To build something good,  
you must be aware of the  
current practices;

to create something great,  
you must be ready to question  
them.

# Introduction 🖐️

I've been shaping digital experiences for over a decade, specializing in UX, design systems, UI, architecture, and visual design.

I am: a self-motivated detail hunter,

Flexible,

Communicative.

During my career, I have crafted applications and websites for Google, Canadian National Railway, NV Energy, L'Oréal, EMSB, Saputo, iCash, DVC, and more.

I have held a variety of positions and wore different hats.

# Selected experience & domains

# Expertise

Creative thinking · Locating and solving problems

To solve a problem, you need creative ways as the primary skill; the tools are secondary.

Quality · Tolerance to the unexpected  
It's accidental that initiates the serendipitous.

Tools

Figma & Creative Cloud Apps

Questioning · Breaking rules and design principles

To build something good, you must be aware of the current practices; to create something great, you must be ready to question them.

# I've learned

The real competition is when you compete with yourself.

Before you can solve a problem, you need to be trusted with it.

Just do your own thing.

One of the biggest satisfactions comes from the ability to translate information using the design system you have created.

Thank you!

I am looking forward  
to hearing from you  
soon.

Ma
